Warranty	5 Year No-Fuss Warranty

VEHICLE APPLICATIONS

Ideal for use in basket type Roof Racks, Station Wagon Roof Racks or with Bar type Roof Racks.

PRODUCT TIPS

- Never store Rack Sack away when wet. Always allow to fully dry out before storing to prevent mildew.
- The Rack Sack fabric is specially treated causing the water to 'bead'. If possible, pack the Rack Sack so that the centre is raised assisting 'beaded' water to run off.

7.3 RACK SACK

PRODUCT INFORMATION SHEET

“Complete protection for all your Roof Rack Luggage”

SAFETY PRECAUTIONS

- Ensure Rack Sack is securely fastened down to the vehicle’s roof rack before driving

FEATURES	BENEFITS
Super tough nylon fabric is 100% weatherproof to keep your luggage completely protected	Peace of mind while you travel knowing your roof top luggage is fully secure
After use, simply fold and store in its compact box	No bulky storage problems
Easy to adjust stretch cargo net with adjustable hooks	Attaches easily to the roof rack
Large Overlapping Flap designed to cover zipper and protect against water entry. Firmly held in place with velcro tabs	Reduce the risk of water seepage through the zipper
All seams are triple sewn with Nylon thread	For extra strength
Large continuous zipper around both sides and rear	Makes loading and unloading a breeze.
Zipper has double slides	Can be padlocked together
Velcro tabs at each bottom corner	Holds the Rack Sack out in position for easier loading
Zipper is covered by a large flap and held down by velcro tabs	Prevents water entry through the teeth of the zipper

Warranty

Bushranger Rack Sack is covered by a Five Year No-Fuss Warranty against material and manufacturing faults, which means that this product will perform to your satisfaction for a minimum of five years, excluding:

- ❑ Accidental or malicious cuts or holes in the fabric
- ❑ Wear and tear, including all abrasion to the fabric, broken buckles, worn or broken zippers

HANDY “TIP”: Heavy items can quickly wear a hole in the fabric if in direct contact with Rack Sack during a long trip. We suggest you wrap such items in felt or similar cloth to avoid unwarranted wear.

Please note that the colour of the fabric will fade after prolonged exposure to sunlight. This is normal and therefore does not constitute a warranty claim.

FITTING INSTRUCTIONS (Included in Product Packaging)

1. Always face the non-zippered end of the rack sack forward for travelling to minimise the risk of water being blown under the flap and through the zipper.
2. Rack Sack comes with four Velcro corner tabs so it can be held out in place for easy loading. These tabs are not for securing the Rack Sack to the Roof Rack when it is fully loaded.
3. Care must be taken to ensure the Rack Sack is fully secured on your vehicle's roof before driving.
4. Care must also be taken to avoid abrasion of the vehicle or the Rack Sack through flapping or other movement. Always attempt to completely fill/extend your Rack Sack to prevent this from occurring.
 - **Note:** If the Rack Sack is mounted directly on the roof of the vehicle and secured between two roof bars there is a risk of damage to the vehicle by abrasion or denting.
 - It is recommended that if the Rack Sack is in direct contact with the vehicle's roof, only use it for shorter trips with soft loads only.
5. Rack Sack must be fully dried before folding and storing away.
6. Rack Sack can be mounted and removed fully laden, if desired for security reasons or for ease of packing in certain circumstances.
